

WAQAS MANI

Full Stack Web Developer

hello@waqasmani.dev · github.com/waqasmani · linkedin.com/in/waqasmani · Remote / Worldwide (UTC+5)

SUMMARY

Full stack engineer with 8+ years designing, building, and operating production web platforms - multi-tenant SaaS, e-commerce with custom checkouts, purpose-built CRMs, and high-throughput APIs. I own outcomes end to end: honest scoping, clean architecture, measured results, and infrastructure that stays boring after launch.

CORE SKILLS

Frontend	Next.js, React, TypeScript, JavaScript, Tailwind CSS, Vue.js
Backend	Node.js, Express, Fastify, REST APIs, Authentication, WebSockets / SSE
Databases	PostgreSQL, MariaDB, MySQL, Prisma, Redis - schema design & query tuning
Cloud & DevOps	Linux, Ubuntu, Docker, Nginx, Cloudflare (+R2), GitHub Actions, PM2

EXPERIENCE

Independent Full Stack Developer 2021 - Present

[Freelance & consulting](#)

- Design, build, and operate client platforms end to end: a multi-tenant operations SaaS across 7 warehouses (92% less stock drift), a headless storefront (+34% checkout conversion, 1.4s LCP), and a freight CRM cutting quote turnaround from 2 days to 2 minutes.
- Rebuilt an analytics ingestion pipeline to sustain 38M events/day on two VPS nodes at 78% lower cost; maintain an open-source zero-downtime deployment CLI used by 1.9k+ developers.

Lead Web Developer 2018 - 2021

[Digital product agency](#)

- Led a four-person team across a dozen concurrent client builds; owned architecture, code review culture, and the CI/CD pipeline that took deployments from monthly to daily.

Full Stack Developer 2016 - 2018

[E-commerce scale-up](#)

- Shipped checkout, inventory, and fulfilment features on a high-traffic storefront where downtime had a price per minute.

HOW I WORK

Scope honestly (surprises belong in week one), ship iteratively (working software on a staging URL every week), measure everything (performance budgets and conversion events, not vibes), and document as I go (the next engineer should sleep well). Clients own their code, repos, and infrastructure from the first commit.

Full case studies with architecture decisions and measured results: see the Projects section of my portfolio.
